Neighborhood Speed Management Program

Community Petition for Traffic Safety Review

The Neighborhood Speed Management Program is part of the Town of Erie's commitment to transportation safety and neighborhood livability, aimed at improving quality of life. The program is a structured system of policies that allocate resources and apply a combination of education, enforcement, engineering, and evaluation to mitigate the effects of speeding traffic while considering equity and emergency response.

By implementing these measures, vehicle speeds on residential streets can be reduced, enhancing safety for pedestrians and cyclists. Slower traffic also encourages more walking and biking, making neighborhood streets safer and more accessible for all users.

This petition is to demonstrate support for the review of traffic conditions on our street(s). By signing below, residents affirm their interest in the Town evaluating traffic speeds in the requested area and potentially implementing appropriate safety measures in alignment with the Neighborhood Speed Management Program.

Requested Street/Area: _____

Applicant Name: _____

Applicant Address: _____

Applicant Email/Phone: _____

Applications must include signatures from either 10 households or 25 percent of the block's households for each requested roadway segment. Only one signature per address will be counted.

Name	Address	Signature	Date

Instructions:

1. Fill in the requested area and applicant information at the top of the form.
2. Obtain signatures from either 10 households or 25 percent of the households on each requested block. Only one signature per address will be counted. Make additional copies of this page if needed.
3. Submit the completed petition form as part of your Neighborhood Speed Management Program application.
